

# Breast Case Submission Requirements

**If applying for accreditation in both diagnostic and interventional breast ultrasound, the same 4 cases may be submitted if the diagnostic and interventional studies were performed at a single appointment.**

<b><i>Diagnostic Breast</i></b>	
<b>From the main site:</b>	<b>From <u>each additional site</u> or <u>mobile unit</u>:</b>
Submit a <b>total of 4 abnormal diagnostic breast cases with corresponding final reports.</b>	Submit <b>1 abnormal diagnostic breast case study with corresponding final report.</b>
<b><i>Interventional Breast</i></b>	
<b>From the main site:</b>	<b>From <u>each additional site</u> or <u>mobile unit</u>:</b>
Submit <b>4 interventional breast cases with corresponding final reports <u>AND</u> their pathology reports.</b> <ul style="list-style-type: none"> <li>• The cases must demonstrate:               <ol style="list-style-type: none"> <li>(a.) clear visualization of the mass</li> <li>(b.) image(s) of the needle in the mass, and</li> <li>(c.) images showing the absence of post-procedure complications</li> </ol> </li> </ul>	Submit <b>1 interventional breast case study with corresponding final report <u>AND</u> a pathology report.</b> <ul style="list-style-type: none"> <li>• The cases must demonstrate:               <ol style="list-style-type: none"> <li>(a.) clear visualization of the mass</li> <li>(b.) image(s) of the needle in the mass, and</li> <li>(c.) images showing the absence of post-procedure complications</li> </ol> </li> </ul>
<b>All cases must follow the <u>General Requirements for the Submission of Case Studies</u></b> <b>(<a href="http://www.aium.org/accreditation/genCASereq.pdf">http://www.aium.org/accreditation/genCASereq.pdf</a>)</b>	
<b><u>Note:</u></b> <b>For the purpose of accreditation, all anatomy must be appropriately labeled (for example – LT BREAST ARAD 3:00 5cm FN).</b>	

# Breast Imaging Checklist

<b>Breast - Diagnostic</b>
<i>Labeled images of the following:</i>
1. Side (right or left breast) demonstrated
2. Image orientation
3. Anatomic location using clock rotation or diagram of breast
4. Location with reference to nipple
5. Images of lesion(s) obtained with measuring calipers
6. Images of lesion(s) obtained <u>without</u> measuring calipers
7. Lesion(s) measured in at least 2 dimensions
8. If diagnostic adjunct survey was done, documentation of clock rotation
<b>Breast - Interventional (if applicable)</b>
<i>Labeled images of the following:</i>
9. Labeled image(s) of procedure site(s) PRE biopsy/biopsies
10. Labeled image(s) of needle demonstrated within lesion(s)
11. Labeled image(s) of procedure site(s) POST biopsy/biopsies
