Case Study Submission Requirements: Breast Ultrasound

- All cases must follow the General Requirements for the Submission of Case Studies.
- All cases must include a finalized corresponding report. For reporting criteria, refer to the Documentation Practice Parameter.
- For the purpose of accreditation, all anatomy must be appropriately labeled (for example – LT BREAST ARAD 3:00 5cm FN).

*If applying for accreditation in both diagnostic and interventional breast ultrasound, the same 4 cases may be submitted if the diagnostic and interventional studies were performed at a single appointment.

Diagnostic Breast

- From the main site: submit 4 abnormal diagnostic breast cases with their corresponding final reports
- From each additional site or mobile unit: submit 1 abnormal diagnostic breast case with its corresponding final report

* Intervventional Breast

The interventional cases must demonstrate:
  a.) clear visualization of the mass
  b.) image(s) of the needle in the mass, and
  c.) images showing the absence of post-procedure complications

- From the main site: submit 4 interventional breast cases with their corresponding final reports and their pathology reports
- From each additional site or mobile unit: submit 1 interventional breast case with its corresponding final report and its pathology report
Breast Ultrasound Imaging Checklist

- **All cases must include a finalized corresponding report.** For reporting criteria, refer to the [Documentation Practice Parameter](#).

- **For the purpose of accreditation, all anatomy must be appropriately labeled (for example – LT BREAST ARAD 3:00 5cm FN).**
