AN INVITATION TO PARTICIPATE IN THE

2014 FORUM ON ULTRASOUND IN MEDICAL EDUCATION
A ROADMAP FOR INTEGRATING ULTRASOUND INTO MEDICAL SCHOOL CURRICULA
June 1–2, 2014
New York Hilton, New York, NY

HOSTED BY—
The American Institute of Ultrasound in Medicine (AIUM) and
the Society of Ultrasound in Medical Education (SUSME)

Topics:
• How ultrasound changes the learning of anatomy
• Curriculum development
• Overcoming implementation challenges
• Value of the student experience
• Hands-on stations highlighting key anatomical areas

Who should attend:
• Deans
• Curriculum developers
• Associate deans
• Anatomists and physiologists

Benefits of ultrasound as a teaching tool:
• Provides a dynamic and comprehensive understanding of anatomy and physiology
• Its robust learning experience attracts the brightest students
• It gives medical schools a competitive advantage
• Ultrasound has applications across almost all specialties; it is already being integrated into daily practice

Schedule:
June 1, 2014—Evening Reception
June 2, 2014, 8 AM–3 PM—Forum Workshop

Why attend:
A growing number of medical schools have successfully introduced ultrasound into their curricula, which serves the school in multiple ways. It attracts potential students and it is an efficient and highly effective way of introducing anatomy and physiology—in real time—in the classroom.

Travel funding is available (hotel and transportation) through a grant from the AIUM’s Endowment for Education and Research Fund.
